

TECHNICAL DATA SHEET

ANTI TRAUMA RESCUE STRAPS

Reference EX915

Product Description :

Designed to prevent compression of the harness leg straps on the legs in the event of a fall : forms a support for the feet to allow the user to stand upright and relieve the pressure on the groin.

Practical and quick to install

- Made in webbing and packed in textile housing, closed by zippers
- Ultra light, they simply attach to the harness via textile loops
- To use them, open the housing and attach the small hook to one of the loops
- Equipped with many loops to allow adjustment to the users' size
- Suitable to all harnesses
